

MUHAMMAD FASEEH

MACHINE LEARNING & SYSTEMS ENGINEER

Lahore, Pakistan | muhammadfaseeh0331@gmail.com | +92-331-6686999 | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Machine Learning Engineer with a Bachelor's in Information Technology, specializing in production-grade LLM applications, generative AI pipelines, and low-latency real-time systems. Proven track record in deploying production ML security classifiers on public cloud platforms, designing hybrid-brain AI assistants with sub-second failover, and building automated content engines. Proficient in Python, FastAPI, PyTorch, RAG architectures, and vector search, backed by industry certifications in Cisco Networking (CCNA) and Microsoft Azure (AZ-900).

TECHNICAL SKILLS

AI / Machine Learning:	LLMs, Generative AI, RAG Pipelines, Prompt Engineering, PyTorch, Scikit-learn, Hugging Face, Vector Search (ChromaDB)
Backend Engineering:	Python, FastAPI, Node.js / Express, RESTful APIs, WebSockets, Async Processing, Multithreading
Databases:	PostgreSQL, SQLite, MongoDB, ChromaDB, FAISS
Mobile & Web UI:	Flutter (Web & Mobile), Next.js, Tkinter, Provider State Management, HTML5/CSS3
Cloud, Infra & Tools:	Microsoft Azure (AZ-900), Docker, Git/GitHub, Vercel Deployment, Linux (Kali / Ubuntu), CI/CD Pipelines
Networking & Security:	Cisco CCNA, TCP/IP, VLAN Routing, Network Architecture, OAuth 2.0 Security

KEY PROJECTS

Phishing URL Security Detector & API (Deployed)

[\[GitHub\]](#) [\[Live Demo\]](#)

Tech Stack: Python, Scikit-Learn, Random Forest, FastAPI, Streamlit, Vercel, GitHub Actions

- Trained and evaluated a Random Forest Classifier to identify phishing web domains in real time based on lexical and structural URL features.
- Built and successfully deployed a production-grade RESTful inference API using FastAPI hosted on Vercel, achieving sub-150ms prediction latency with continuous integration via GitHub Actions.

J.A.R.V.I.S. - Hybrid AI Personal Assistant

[\[GitHub\]](#)

Tech Stack: Python, Google Gemini API, Ollama / Llama 3.2, Tkinter, Multithreading, psutil

- Architected a triple-layer hybrid LLM system with sub-second automatic failover between Google Gemini API and local Ollama/Llama 3.2 models, guaranteeing 100% voice continuity during API rate limits or network drops.
- Engineered a custom NLU intent parser converting natural speech into structured JSON schemas to execute desktop automation tasks.
- Designed an asynchronous, multi-threaded Python core running audio capture, local LLM inference, TTS generation, and a dynamic Tkinter visualizer in parallel without event loop blocking.

AI Social Media Content Generator

[\[GitHub\]](#)

Tech Stack: Python, Google Gemini API, FastAPI, Next.js, Tailwind CSS

- Engineered an automated GenAI content tool leveraging Gemini API to synthesize platform-optimized post captions, tags, and scheduling metadata.
- Developed a high-performance RESTful API using FastAPI with structured prompt engineering routines to output tailored content across multiple brand tones.
- Designed a responsive Next.js web interface featuring real-time post preview, dynamic tone selection, and instant copy-to-clipboard actions.

EDUCATION & CERTIFICATIONS

Bachelor of Science in Information Technology

Graduation: Nov 2026

Superior University, Lahore | *Relevant Coursework: Deep Learning, DSA, Databases, Data Science, Cloud, Mobile Dev*

Cisco Certified Network Associate (CCNA)

Dec 2022

CORVIT Networks, Lahore

Microsoft Certified: Azure Fundamentals (AZ-900)

Dec 2022

CORVIT Networks, Lahore

LANGUAGES

English: Professional Working Proficiency | **Urdu:** Native/Bilingual Proficiency
